PROFESSIONAL SUMMARY

Software Engineering and Machine Learning student pursuing a B.Tech in Computer Science (AI & ML) with experience building scalable full-stack applications using Python, C++, React, FastAPI, Flask, REST APIs, and Generative AI. Strong foundation in data structures, object-oriented programming, software engineering, cloud deployment, and AI-driven application development. Focused on building reliable, scalable software systems that solve real-world customer problems.

TECHNICAL SKILLS

Programming: Python, Java, C, C++, JavaScript

Core CS: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Database Management Systems, Computer Networks, Problem Solving, Software Engineering

Machine Learning: NumPy, Pandas, PyTorch, Scikit-learn, TensorFlow, OpenCV, CNNs, Keras, Support Vector Machine, Deep Learning, NLP, Generative AI, Prompt Engineering, Feature Engineering, Model Evaluation, Hyperparameter Tuning

Web Technologies: React.js, HTML5, CSS3, Flask, REST APIs, Fast API

Databases: MySQL, MongoDB, Firebase Firestore

Tools & Platforms: Git, GitHub, Docker, Linux, Firebase, Vercel, Render, CI/CD, Jupyter Notebook, Google Colab, Visual Studio Code

PROJECTS

AI-Powered Resume Analyzer

[GitHub](#) | [Live](#)

Tech Stack: Python, Flask, Google Gemini API, React.js, Scikit-learn, PyPDF2, PyTesseract, PDF2Image

- Designed and developed a full-stack AI Resume Analyzer using Flask, React, and Google Gemini API, enabling automated ATS analysis through OCR, PDF parsing, keyword extraction, and LLM-powered recommendations.
- Built modular REST APIs handling document upload, parsing, AI inference, and response generation while optimizing latency and maintainability.
- Integrated OCR, PDF parsing, and LLM-based analysis to support both scanned and digital resumes while generating personalized ATS feedback.

Intelligent Candidate Ranking System (India Runs Hackathon)

[GitHub](#) | [Live](#)

Tech Stack: Python, FastAPI, React, TypeScript, Docker

- Developed a **production-grade multi-agent candidate ranking engine** for the India Runs × Redrob AI Hackathon, coordinating **10 specialized agents** for job understanding, candidate evaluation, scoring, ranking, and recruiter reasoning.
- Engineered an **offline CPU-only ranking pipeline** capable of evaluating and ranking **100,000 candidate profiles in under 53 seconds** while operating within **200 MB RAM**, eliminating external API dependencies.
- Designed deterministic scoring and anti-honeypot validation to detect inconsistent candidate profiles using chronological verification, technology-age validation, and logical consistency checks.
- Built a FastAPI backend with a React dashboard and Dockerized deployment for scalable, reproducible execution and recruiter-friendly visualization.

Clutch

[GitHub](#) | [Live](#)

Tech Stack: React, Express.js, Node.js, Google Gemini API

- Built an AI-powered productivity assistant that automates task organization and intelligent planning.
- Developed secure REST APIs and integrated LLM capabilities for personalized recommendations.

- Deployed the application using modern cloud hosting platforms while following modular software engineering practices.

EDUCATION

Lovely Professional University

Phagwara, Punjab

B.Tech in Computer Science & Engineering (Artificial Intelligence & Machine Learning)

Expected Graduation: 2028 | **CGPA:** 7.57/ 10

PROFESSIONAL EXPERIENCE

Machine Learning Intern | SoftGrowTech (Remote)

Jul 2026 – Present

- Developed and integrated machine learning models into real-world applications using Python and Scikit-learn.
- Built REST API-based AI solutions and collaborated on model deployment, testing, and performance optimization.
- Worked with Git for version control and followed software engineering best practices throughout development.
- Improved model accuracy and reliability through data preprocessing, feature engineering, and iterative evaluation.

Python Development Intern | Navodita (Remote)

Jun 2024 – Aug 2024

- Built Python automation tools to reduce repetitive manual workflows.
- Developed modular object-oriented applications following software engineering best practices.
- Collaborated with mentors to deliver automation modules on time while improving code quality through debugging and documentation.

LEADERSHIP & POSITIONS OF RESPONSIBILITY

Class Representative (CR) | Lovely Professional University

Jan 2026 – Jun 2026

- Coordinated class schedules, announcements, and academic activities for 60+ students.
- Served as the primary liaison between faculty and students, ensuring effective communication and timely issue resolution.
- Organized section-level academic coordination, ensuring timely communication between faculty and students.

Veteran Ambassador | Techfest IIT Bombay

May 2026 – Present

- Selected as a Veteran Ambassador for Techfest IIT Bombay 2026–27.
- Promoted Techfest IIT Bombay events through campus outreach and student engagement initiatives.
- Represented Techfest IIT Bombay by encouraging student participation in innovation and technology events.
